Introduction

Emtidad Advanced Company is a specialized firm in maintenance services for facilities and infrastructures, particularly in the fields of oil and gas industries. In addition, the company offers various other specialized services such as project management in construction and civil works, industrial support services, electromechanical installations, firefighting installation, manpower support services, and the implementation of effective maintenance techniques, including construction and preparation of sites and facilities in the oil and gas sector, both onshore and offshore.

Emtidad is also known as a full-service provider for major EPC companies throughout the Saudi Arabian market.

The company has obtained ISO 9001, ISO 14001, and ISO 45001:2018 certifications, as well as being accredited according to Aramco's cybersecurity standard, SACS002.

Our company provides a wide range of support services tailored for oil and gas fields. These services encompass skilled manpower support holding all Aramco certifications, equipment and machinery maintenance, equipment cleaning, and various other offerings to ensure efficient operations. We provide all kinds of cleaning services. We have gained unique expertise in ensuring high safety standards on existing oil and gas platforms. Safety, quality, responsibility, flexibility, intelligence, professionalism, and business ethics are our top priorities.

We maintain a high-level corporate culture based on mutual respect and a proactive approach to implementing safety measures for employees and clients. We usually establish an integrated project team consisting of Emtedad and client employees to align common goals.

To enhance alignment of mutual objectives, we agree on a comprehensive set of key performance indicators and standards, including service quality, reliability, cost reduction, efficiency, health, safety, and environmental management. By maintaining our focus on stability, continuity, and reliability, we achieve unparalleled results for our partners year after year.

CEO Message

We are committed to meeting our customers' needs and providing the highest levels of service with efficiency and professionalism, driven by our values of integrity, transparency, and customer respect.

We have an exceptional team that adheres to quality and safety standards and utilizes advanced digital technologies to deliver comprehensive solutions for operations, maintenance, and facility management across the oil and gas, petrochemical, manufacturing, construction, equipment rental, and cleaning sectors.

Our goal is to ensure sustainability and profitability for all stakeholders by continuously striving and adding value to our customers through innovative solutions.

Yours faithfully,

Emtidad

Ali bin Abdulmoneim Al-Mutairi.

CEO

Our Vision:

To be the foremost partner and pioneers in providing integrated support services across various sectors in the Kingdom, while achieving sustainability goals with utmost financial, social, and environmental responsibilities.

Our Mission:

To provide high-quality integrated support services to various sectors in the Kingdom, aiming to achieve sustainability and sustainable development. We strive to accomplish this through innovation and financial, social, and environmental responsibility, meeting our clients' needs and enhancing the efficiency and effectiveness of their operations.

Our Values:

Excellence

We constantly strive for excellence in our services, delivering the highest quality and efficiency to our clients.

Responsibility

We fulfill our social, environmental, and financial responsibilities towards our clients and the community with integrity.

Sustainability

Our focus is on achieving sustainability goals, preserving natural and social resources for sustainable development.

Innovation

Embracing technological advancements and innovation in our services to meet clients' needs with new and efficient approaches.

Partnership

Building strong and sustainable partnerships with our clients to achieve their goals and provide optimal solutions.

Customer Satisfaction:

Ensuring customer satisfaction by delivering outstanding services that exceed their expectations.

Personal Development:

We value the personal development of our employees, empowering them to reach their full potential and contribute effectively to the company's objectives.

Trust and Integrity:

We maintain relationships built on trust and integrity with all stakeholders and partners.

Continuous Improvement

We strive for continuous development and improvement in our services and operations to achieve the best results.

Interaction and Communication

We believe in the value of interaction and effective communication within the company and with our clients and partners to achieve our common goals.

Quality Policy

“Emtedad. shall provide reliable and efficient services to its Client Base whilst conforming to the Company’s mission and vision and the required legal and safety rules and regulations and to maintain Customer satisfaction. In order to achieve this, Emtedad implements a fully integrated documented Quality Management System as per Quality International Standards, for which the CEO is ultimately responsible.”

This QMS ensures that Emtedad can fulfill its contractual obligations by:

- Ensuring that all activities which directly affect the quality of service are carried out under strictly controlled conditions.
- Close and continuous monitoring and analysis of quality indicators which provide feedback to enable quality improvement, giving due regard to the human factor.

- Providing up-to-date instructions and training to all staff together with the promotion of quality awareness.
- The CEO ensures that this policy is communicated understood and implemented at all levels in the Company.

Health & Safety Policy

Emtidad shall always strive to exceed the expectations of its clientele and applicable legal/regulatory requirements, by supplying quality products & technical services at optimum prices backed with reliable and efficient service.

The Health and Safety of the employees working on our projects is the major consideration in the operations of the company. We intend to put 'Safety First' by planning job phases and activities well in advance so that conflicts between safety and installation do not arise during the execution phase of work as per ISO45001 & ISO14001. The following policy will prevail on our projects:

Providing adequate control of the Environment, health, and safety risks arising from our work activities;

Consulting with our employees on matters affecting their health and safety;

Providing and maintaining safe plant and equipment;

Ensuring safe handling and use of substances;

Providing information, instruction, and supervision for employees;

Maintain safe and healthy working conditions;

Preventing accidents by analyzing root causes and eliminating them.

This policy statement is to be reviewed every 12 months

Ensuring all employees are competent to do their tasks and give them adequate training;

Business approach:

- 01.** Our businesses are supported by an integrated quality management system that underpins every aspect of its operations.
- 02.** By strategically positioning quality management at the heart of its operations, the company has bound together the full value chain of a building solutions company, thus embedding the concept of a triple-bottom-line management culture, which is central to reinforcing sustainability and delivering a quality outcome to all stakeholders.

Geographical footprint:

Emtidad is a KSA company with a growing Local and regional footprint, ensuring that it understands and works within the parameters of local conditions, managing all risks effectively; thus giving clients peace of mind through quality delivery on time, whatever the challenges.

The company has the ability to swiftly redeploy resources between countries of operations to meet clients' requirements and to optimize all opportunities to suit stakeholder strategies.

The company operates all over KSA's main cities and has a focus on establishing a future firm presence in the GCC area.

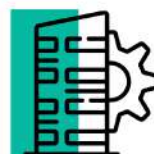

Emtad at a glance – structure and service offering:_____

The company offers a range of integrated support services primarily tailored for the following sectors:

Oil and gas sector.

**Facility
management sector.**

**Construction and
building sector.**

Scope of work and support services for the oil and gas sector:

Well-site cleaning and preparations (Site preparation for an oil and gas project).

Well-pad construction.

Well pad demolition and stripping.

Oil and gas skid supply and installation.

Supply and installation of corrosion inhibitor skids.

Heavy tank cleaning.

Manufacturing supply and installation of chemical containers and chemical handling units.

Cold-cutting eco.

Hydro jet cleaning and hydro blasting.

Heavy machinery / equipment rental.

Catering and support services.

Providing skilled and experienced workforce (with all Aramco certifications) for both offshore & onshore.

Vehicle rental services (Emtidad provides you with a unique combination of professional advice and a fully certified equipment fleet complying with local industry requirements).

Piping cleaning and flushing (Engaging in a regular pipeline cleaning and flushing regimen reduces the risk of leakage and failure, which prevents potentially catastrophic damage to natural environments and waterways as well as the loss of a massive dollar amount of liquid or gas)

Yard maintenance for Aramco support service companies.

Providing technical support for well testing, coil tubing, cementing, and stimulation departments

Delivering all kinds of materials as per the project's needs & requirements.

Chemical supply and provides support for handling (have employees with chemical handling experience and certifications)

Waste management support (Waste management plays a crucial role in the oil and gas industries, as it minimizes adverse consequences linked to waste accumulation from manufacturing and service provision. Today, organizations within these industries are increasingly prioritizing the reduction of waste in their production processes).

The key steps involved in oil and gas waste management are:

» Waste identification:

Conducting waste audits.

Developing inventory of waste types.

Classifying waste.

Quantifying waste.

Identifying hazardous waste.

Keeping records.

» Segregation and storage.

» Waste minimization.

» Treatment and recycling.

» Disposal.

» Monitoring and reporting.

» Continuous improvement

Chemical
decontamination.

Oil flushing.

Bulk tank unit cleaning
and maintenance.

Industrial vacuuming

Oil and gas pipeline
installation.

Various types of pipeline
installations for electricity,
communications, and others.

Thermal insulation for oil and
gas equipment.

Provides all kinds of
janitorial services.

Scope of work and support services for the facility management sector:

Industrial support services (including skilled and unskilled labor supply, equipment .rental, site support facilities, assistance in installation and operation, etc.)

Insulation services.

Logistics services.

Road maintenance (bridges, underpasses, overpasses).

Hospital and healthcare facility cleaning services.

City cleaning and waste disposal services.

Parks and recreational areas maintenance services.

Aircraft and airport cleaning services.

Catering services.

External facade cleaning services for buildings.

Electromechanical installations, firefighting installations, and CCTV camera installations.

Scope of work and support services for the construction and building sector:

Design and engineering services.

Construction project management and EPC projects.

Road construction (bridges, underpasses, overpasses).

HVAC (Heating, Ventilation, and Air Conditioning) works.

The sequence of operations and procedures:

01

Requirements Gathering:

Communicate with the client to determine the scope of work and identify the gaps that require our services.

02

Pre-Contract:

Agree on the scope of work, submit the technical and financial proposal, and sign a formal contract with the client.

03

Kickoff:

Assign work team, prepare a project plan, and logistics, define communication channels, and get client approval on all of them.

04

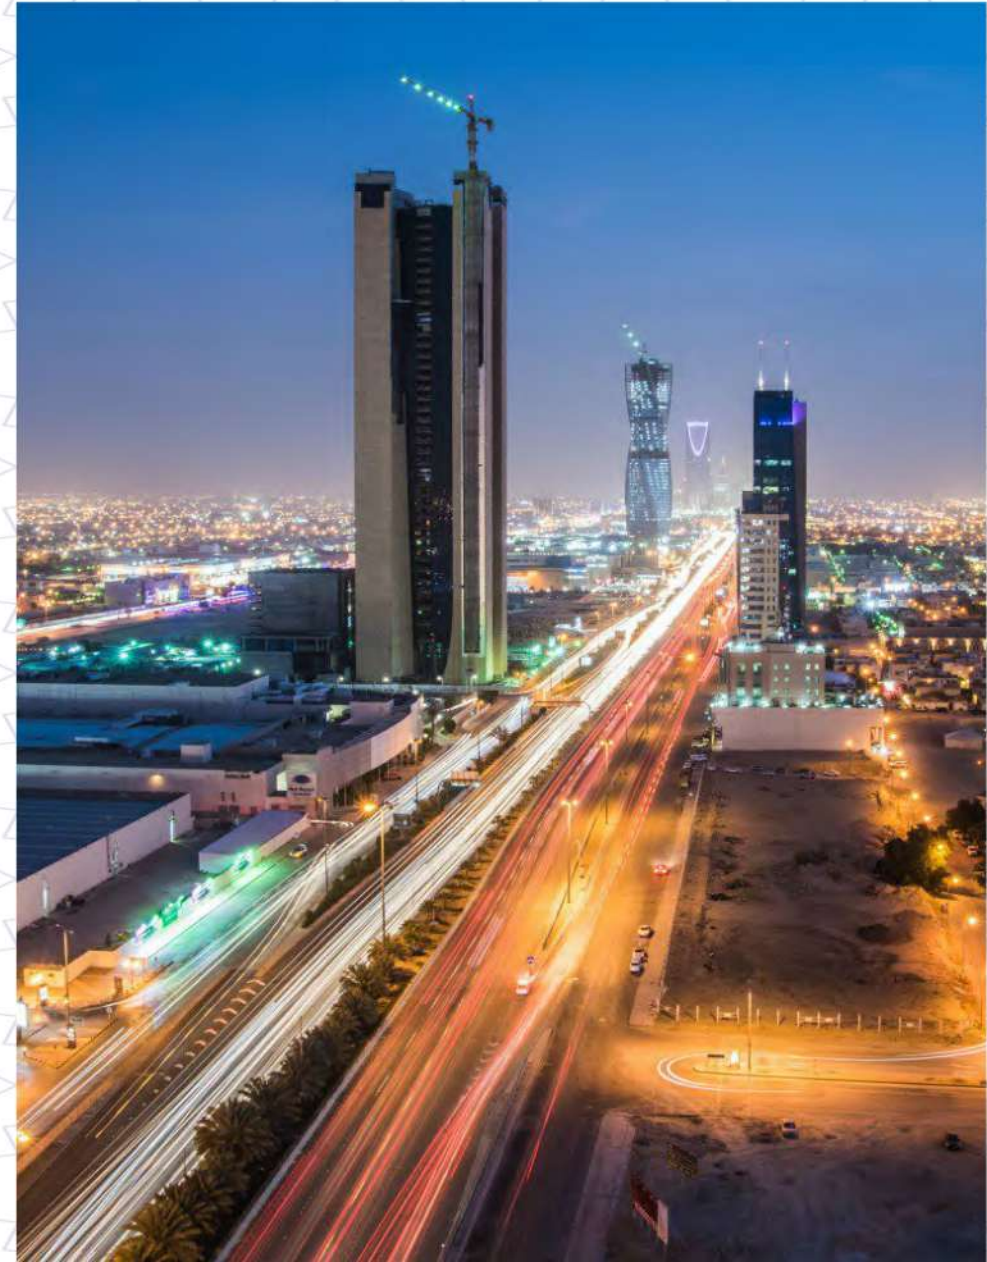

Execution

Execute the project, submit various reports, and hold follow-up meetings with the project sponsor (or the client representative).

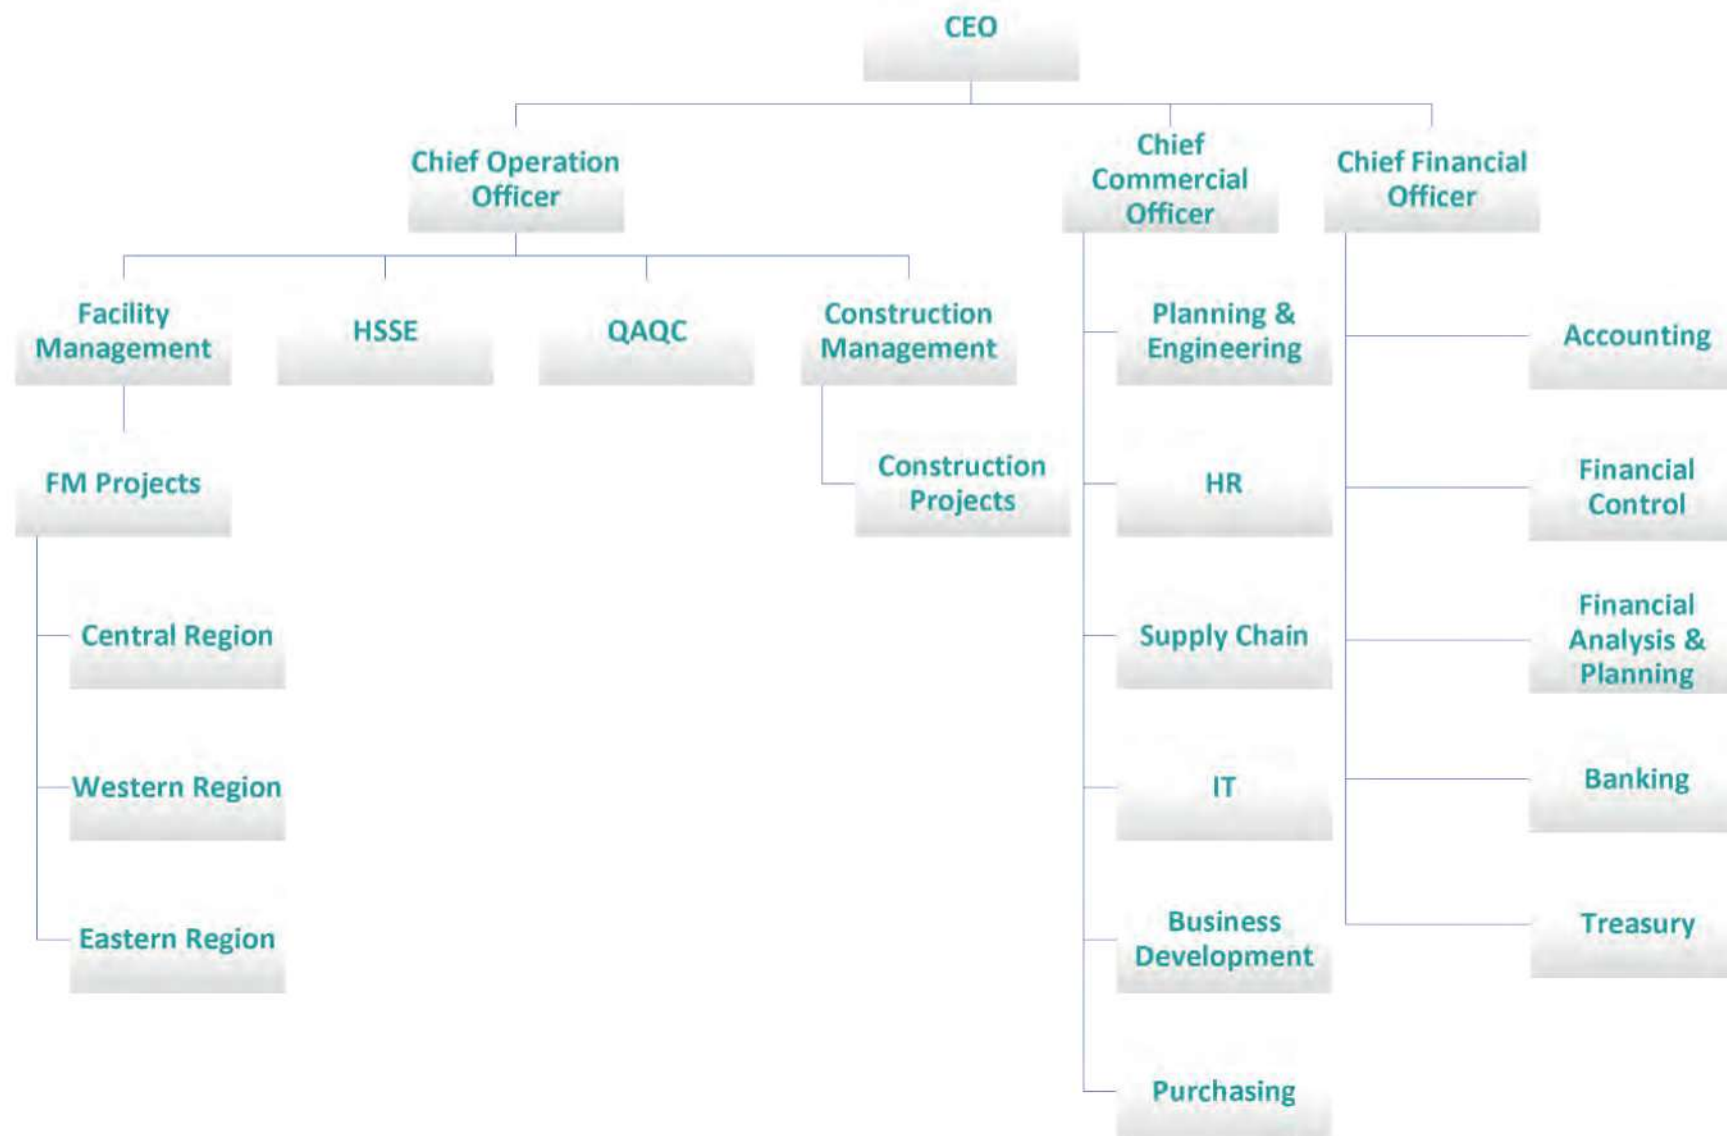

05

Closing and Handover

Final handover meeting, submit the final report to the client, and obtain final approval from the project sponsor (or the client's representative).
